

Carbon Reduction Plan

Supplier: TSC Lifesciences Ltd

Publication Date: 6 March 2024

Commitment to Achieving Net Zero

TSC Lifesciences Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emission. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: TBC
Additional Details relating to the Baseline Emissions calculations
The results will be calculated using DEFRA and other internationally recognised metrics.
Baseline year emissions:
These are to be calculated from data obtained over the period of the first two years of trading for TSC Lifesciences Ltd in the UK. TSC Lifesciences was first incorporated on 17 November 2023 and will commence trading in the UK on 1 April 2024. The company is a sales and distribution organisation for her manufacturing partner companies based in the Netherlands and France.
TSC Lifesciences Ltd has currently not generated any Scope 1 or 2 emissions. The company does not generate any emissions upstream via energy usage and would only report on Scope 3 emissions generated by downstream activities from its (third party, 3PL) 3PL Logistics partner, 3PL Servicing & Repair partner and employee travel (there are no company owned vehicles) initially.

Carbon Reduction Projects

Based on the information retrieved after the baseline year, targeted carbon reduction plans can be set-up and initiated. These reduction plans could involve: to encourage employees in eco-friendly travel; paperless administrative policies; prioritise eco-friendly methods of product transport.

Next Steps

Next steps are to review data collected from the companies first two years of trading and generate calculations for a baseline year. From this point to review and set targets for emission reductions downstream and working with partner companies to ensure their commitment to a carbon neutral situation.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions will be reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 3 emissions will be report in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
