

# Broncoflex<sup>®</sup>

# BUILDING A SUSTAINABLE FUTURE

Sustainability is defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs.<sup>1</sup> At TSC Life we take this message to heart, and although we are not where we want to be yet, **each day we are taking steps to bring us closer to our NetZero goal of 2050.**

## More sustainable packaging

Our first goal is maintaining safety by ensuring sterility. By changing the packaging, the following reductions will be achieved:

- Resulting in a 40% overall weight reduction per carton box, reducing waste and transportation emissions.<sup>2</sup>
- The new packaging is also designed for easier disposal, potentially enhancing your workflow.

\* at 100.000 endoscopes per year

\*\* by switching to electronic Indications for use

As a customer you will experience no decline in quality, however you will know that the new packaging is a step in the right direction of reducing the carbon footprint of the products you use.

The use of our medical equipment is solely intended for the use of healthcare professionals. Healthcare professionals have the obligation to exercise their own professional clinical judgment when determining the suitability of a specific product for treating an individual patient. TSC Life does not provide medical advice and strongly advises healthcare professionals to undergo training on the usage of any specific product before using it. Healthcare professionals should consistently refer to the package insert, product label, and/or instructions for use, including guidelines for cleaning and sterilization (if applicable), before utilizing any product supplied by TSC Life. The information presented aims to display specific products and the extensive range of offerings from TSC Life. Availability of products may vary across markets due to regulatory and/or medical practices specific to each region. For inquiries regarding the availability of specific TSC Life products in your area, please reach out to your TSC Life representative.

## Thoughtfully designed

The weight of the Broncoflex is only 127g resulting in a small environmental footprint of materials.

We are currently running a detailed LCA study (with 3rd party) to be able to improve our global impact in the future.

## Made in France

At TSC Life we manufacture our products inhouse, in Tours, France. Meaning that for our European customers the products are manufactured close to home; reducing CO<sub>2</sub> emissions from transportation.
